Report on:- Used Car Selling Shop

1. Title:- **Used Car Selling shop**. It is landing web page using Html, CSS and Javascript.
2. Description:- Here developed a web page using html, css and javascript. By using this web page, user can seen and purchase used car in chief rate on this.
3. Step taken: - I have been used one page of programming in given step.
4. Challenges:- most challenging to developing is searching a HD photography of car on websites but finally I got it
5. Solution implemented: -It will be the best solution in future to purchase used or second hand car on my web page . it will be host and make easy to use of user to find car.
6. Learnings:- we I coding for this project , I got it is best option to revising my skill and I have perform here in little amount.
7. Project Update:- In future on this project Many services will be added for user which came on this web page further hosting with working domain . it will be shortly. I am planning to more work on it to make attractive, easy,helpful, insurance facilities, home delivery, test drive option, etc.
